ADVANCED AUDIO FEATURES

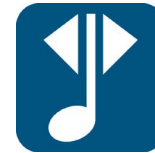

Featured Favorites

Featured Favorites is a group, or multiple groups of channels selected by our programmers and automatically saved to your radio. They are refreshed periodically, allowing you to continually discover everything SiriusXM has to offer.

Sports Flash

SportsFlash™ will notify you when a big play happens during a game with one of your favorite sports teams. Choose to tune in and hear the play unfold like it was live. Continue listening to the game, or you can return to your previous channel.

TuneScan

When you activate the TuneScan™ feature, you will hear a few seconds of the songs, which have not been listened to, from each of the Favorite Preset music channels on the current Band. Find a song you like and tap the TuneScan button again to continue listening to that song.

Tune Mix

Use TuneMix™ to create your own music channel that's a blend of songs from your favorite channels.

Smart Favorites

SmartFavorites allow you to rewind and replay any missed programming from your current Band of Preset channels.

Traffic and Weather Now

Keep moving with Traffic & Weather Now™. Access the latest Traffic & Weather report for your favorite market, whenever you want to hear it.
