

NissanConnect
SERVICES POWERED BY
SiriusXM

NissanConnect® Services powered by SiriusXM®¹ provides added safety, security and convenience features that are designed to keep your clients connected to their vehicle, even when they are not behind the wheel. **Available on select 2025 models.**

Why is NissanConnect Services Important?

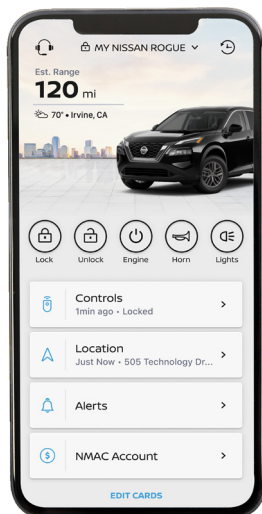

- NissanConnect Services provides important security features like Automatic Collision Notification to give your customers peace of mind.
- Customers can remotely access their vehicle from their favorite devices such as their smartphone, smartwatch³, or using just their voice.

Enrolling Your Customers

Included trials start on the vehicle's purchase date, so it's important to enroll your customers to ensure they have the full opportunity to use their services. You can help the customer create app credentials during NCAR delivery.

1. When complete with Step 2 Delivery Readiness in NCAR go to Step 3 Onboarding. Customer information will be pre-populated with inputs from their NCAR profile.
 2. Have the customer verify, edit or add any necessary profile information
 3. Have the customer enter or confirm their email address and input a password and confirm mobile number to receive SMS link.
- *This email address and password will be used as the customer's login credentials for the MyNISSAN app.**
4. Have the customer ACCEPT Terms & Conditions and select "Register".
 5. Upon consent of a one-time text, a link will be sent to the customer's mobile number to download the MyNISSAN App.
 6. Once submitted, the services will activate, and the customer can log in to the MyNISSAN app using the email and password established via NCAR.

For enrollment issues contact ncs@nissan-usa.com.

Pro Tip #1: Show Customer the Benefits

Download the MyNISSAN App to your smartphone. You can use Demo Mode to show customers what the app looks like and how to use key features like Remote Engine Start, or how they can set alerts - all without needing login credentials or a vehicle to connect to.

Pro Tip #2: Check for the SOS Button

The easiest way to tell if a vehicle is equipped with NissanConnect Services is to check for the SOS button in the overhead console.
